

MatrixStore Vision

XMP Metadata

Version 0.53 DRAFT, March 2017

Overview

The following tables contain all XMP metadata extracted and stored by MatrixStore, and displayed in Vision. The values in the **Type** column are the data type of the stored values. The default type is *String* unless specified.

String+ however indicates that the string has been constructed from an array of values, which are now separated by a semi-colon and a white space. i.e. *London; Tube; News*

Dublin Core (dc:)

Name in GUI	Type	Attribute Key	Example Value
Title	String+	_xmp_dc_title	Object-Matrix training part 1
Coverage		_xmp_dc_coverage	House of Lords
Description	String+	_xmp_dc_description	Example; Exemple
Subject	String+	_xmp_dc_subject	Queen; Birthday; Army
